

## Quality Management System Policy

This Policy is based on the development strategy of CUBE SYSTEMS Sp. z o.o. which strives to be the preferred partner and the leading contractor in the field of implementation of projects connected with the construction of industrial infrastructure and technological solutions.

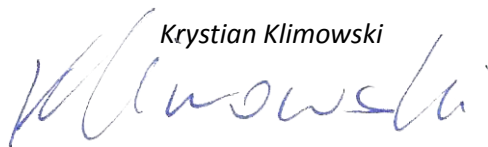

The most important long-term goals in the implementation of this strategy are building the expert status and the satisfaction and trust of our clients.

CUBE SYSTEMS Sp. z o.o. intends to consistently implement the development strategy by:

- Increasing the competence in the technology used by the Company consciously and quickly;
- Striving to create intelligent, measured and competitive tenders;
- Focusing on a very conscious presence in the market of industrial automation;
- Commitment to building good relationships with customers;
- Developing strategies to promote common use of innovative technologies that improve the efficiency of technological processes;
- Compliance with legal regulations related to the quality of the services provided;
- Continuous improvement of the Quality Management System.

We expect our employees to actively participate in the culture of improvement, so that their experiences and creativity become widespread and used in the continuous development of the company.
